

## How will FY doctors and educators benefit?

This is the ONLY journal for Foundation Years doctors and educators, specifically written according to the MMC curriculum. Each issue provides comprehensive clinical cases for trainees as well as practical teaching assessments for educators. Readers will benefit from:

**MMC curricular based content** to enhance understanding of the core competencies required from future leading doctors

**Focus on two specialty-specific clinical cases** each month to form broad subject coverage

**Additional indepth** good clinical and acute care articles aligned with the CBD assessments

**Training guide for FY educators** with proposed clinical cases for teaching sessions

**Practical and informative** articles written by senior doctors and consultants

**Extra revision** with comprehensive assessment questions. The answers will be published in the next issue, but 123Doc will advance answers to clinical tutor subscribers so they can engage their students in the learning process

## Upcoming issues include:

Vol. 1, Issue 1, April 2007 - Cardiology and Respiratory

Vol. 1, Issue 2, May 2007 - Rheumatology and Haematology

Vol. 1, Issue 3, June 2007 - General Surgery and Gastroenterology
